

# Sentencia

2016

Sentencia is the first and only wine during the first 9 years of our winery. In the project from the beginning all our passion and illusion in making a great wine, with a marked identity, intensity and prospects for the future. It is the wine that stands at the forefront of our project, in which we use the best fruit and where we consider our origin is best reflected.

## THE VINEYARD

**LOCATION:** Los Pedrones, Requena (Valencia).

**RAINFALL:** 190 mm.

**CROP TYPE:** Organic growing.

**AGE OF THE VINEYARD:** > 60 years.

**PLANTING DENSITY:** 1500 plants/ha.

**YIELDS:** 7,5 hl / ha.

**ALTITUDE:** 700 to 730 masl.

**TRAINING SYSTEM:** Traditional glass.

**HARVEST PERIOD:** September and October.

## IN THE CELLAR

**WINE MAKING:** Selection of grapes in the field and in the winery, destemming 80%, indigenous yeasts (no oenological product is used that is not sulphurous in very low doses), manual work of the cap during maceration-fermentation, in small stainless steel tanks. Natural clarification. Bottling without filtering.

**BLEND:** Bobal 80%, Garnacha 20%.

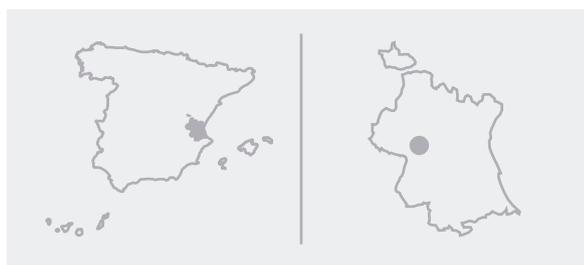

**AGEING:** 15 months, 2,3 and 4 year old french oak barrels.

**DATE OF BOTTLING:** May 2018.

**PRODUCTION:** 3000 bot 0,75L.

**ANALYTICS:** Alcohol: 14,25% vol. pH/acidity: 3,22 / 5,51 g/hL.

**APPELLATION OF ORIGIN:** No.

## LOCATION. VILLAGE OF LOS PEDRONES (REQUENA)

Los Pedrones, the place where I was born and grew up, is today the epicentre of our project, the place where our small winery is located and where we cultivate the largest area of vineyards, around 8 ha.

This village is located in the S.E. area of the Utiel-Requena. It is the border of this region with Cofrentes to the south, and Cortes de Pallas to the east. In addition, it is a natural border for different reasons: the Cabriel river, its confluence with the Jucar river, as well as the forest that occupies most of the territory. This factor allows warmer summers than in the rest of the region, and is a determining factor in the smallholder structure of the crops.

We have a Mediterranean climate, with an important continental influence. The annual rains usually oscillate between 300 and 450mm. The cultivation of the vines is situated around 700 meters above sea level. The traditional varieties are Bobal, Garnacha and Royal, on soils of sedimentary origin formed during the tertiary and quaternary periods, composed mainly of lacustrine miocene limestones, sands and loams on the hills, and grey clays and gypsum in the valleys.
